CASE STUDY PRESENTATIONS (1.5 CE)

DRS. BRYCE SZCZEPANIK, JEFF GARDNER & ADAM MATTHIAS

COURSE SYNOPSIS:
- Case 1: Introduction to the application of CBCT in endodontics. It will focus on the diagnosis of periapical pathology, root fractures, assessment of complex root canal anatomy, root resorption, retreatments, and surgical planning.
- Case 2: A brief summary of a recent experience at the Wehrle implant immersion course.
- Case 3: Indications and Reasoning for Extraction of 3rd Molars

COURSE OBJECTIVES:
- Describe the endodontic applications of CBCT
- Understand some of the benefits and limitations of CBCT
- Understand the need to consider implant options to replace missing teeth
- Understand the value of CBCT when planning implant placement
- Identify timing of 3rd molar extractions
- Identify risks of watching 3rd molars
- Identify reasons for watching 3rd molars

Dr. Bryce Szczepanik was born and raised in St. Joseph, MO. He attended Missouri Western State University where he earned his Bachelor of Science degree in Biology. He then attended UMKC School of Dentistry where he was awarded his DDS degree. He attended the Advanced Education in General Dentistry program at UMKC before moving to sunny Charleston, SC for his endodontic training.88 Dr. Szczepanik was awarded his Certificate in Endodontics and Master of Science in Dentistry degree in 2018 from the Medical University of South Carolina where his thesis was focused on utilizing CBCT to create 3D printed guides for endodontic access. Dr. Jeff Gardner graduated of UMKC in 1997 and has been in involved in organized dentistry since graduation. He is a Past President and the current Treasurer of Northwest Dental Society. He has been in private practice in Maryville for 20 years. Dr. Adam Matthias was born and raised in Saint Joseph, MO. He did his undergrad at University of Missouri Columbia, graduated from UMKC in 2012 and completed his OMS program at Vanderbilt University Medical Center, Nashville, TN.
